

COMO

modular cork furniture

www.corkmodular.com

The main characteristics of cork are lightness, flexibility, and impermeability. Cork is biodegradable, recyclable and renewable.

For the COMO we use two different kinds of composite cork which is a byproduct of the winestopper production.

Oak forests form one of the richest ecosystems in terms of biodiversity worldwide. In Portugal, there is the largest cork oak forest area in the world.

It comes in natural light brown and smoked dark cork.

100 % made in Portugal.

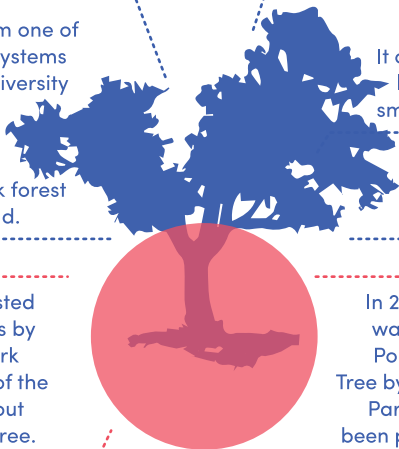

CORK is harvested every nine years by stripping the cork from the trunk of the Cork Oak, without damaging the tree.

In 2011, the cork oak was declared to be Portugal's National Tree by the Portuguese Parliament and has been protected by law since the 13th century.

No trees are cut down which makes it a prime example of sustainability and interdependence between the cork industry and preserving the environment.

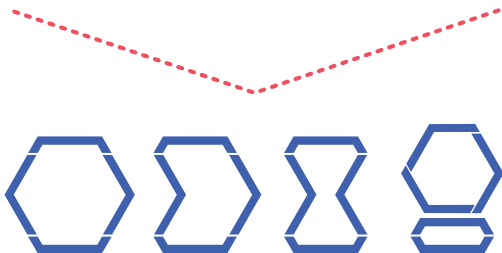

The ability to retain carbon dioxide is also passed on to manufactured cork products which continue to ensure this function to absorb CO².

A stripped cork absorbs on average five times more CO².

COMO stands for “cork modular” and our passion is reshaping interior design and developing smart design solutions that allows you to co-create adaptable furniture modules for your Home, Office or Shop Interior.

➡ MODULARITY – With 12 different cork elements, 16 textile straps and wooden pins you have 5 different possibilities to assemble the modules.

- **CREATIVITY** - A simple toolkit to inspire people to co-create and to reshape their furniture. The modules can be arranged in unlimited numbers and arbitrarily.

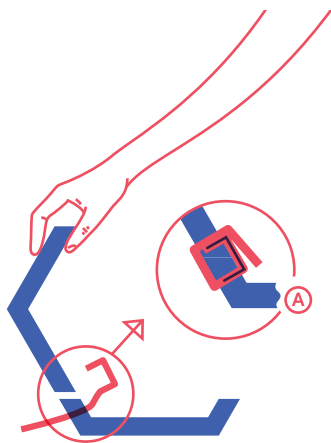

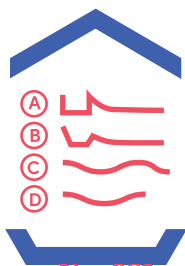

Easy to assemble without tools.

- **ADAPTABILITY** - Imagine one day you use it as a bedside table, a bookshelf, a storage box or change the shape to a wine rack.

On another day you have it in the office as a laptop support or it is a playful furniture set for your kids.

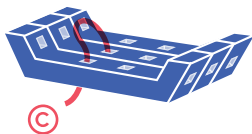

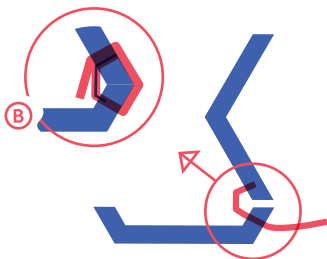

A simple, creative, and extremely flexible way to furnish your space.

Find all your Como parts

With 48 cork elements
and 40 straps you can
build up a complete
shelving unit with all
five different modules.

Connect the parts

SCALABILITY – No limits in extent.

One single module fits into a small apartment and multiple modules can be assembled as a bigger installation in an open space.

COMO matches to your needs.

MISSION – Bringing creativity and nature into people's lives.

COMO reflects a new approach for interior design and we are using a sustainable and ecological material.

Enjoy the experience and get inspired.
